

**POLYESTER FILTER SOCK**

Cuvo Supplied filter sock is a continuous woven, seamless, 100% filter fabric knitted specifically for groundwater applications where extra filtration is needed. All sizes are sold in 100 ft. rolls. This filter sock installs easily and quickly over slotted well screens without the need for any special equipment and are simply secured in place with plastic wire ties. It does not require glue or ultrasonic sealing, thus eliminating weak spots. When properly installed, they do not tear or bunch up on the screen.

- Seamless , Knitted filter fabric.
- Filtration opening size for plush fabric is 250 microns.
- Vertical and horizontal applications.
- Open pit and tank installations.
- Helps prevents well failures.
- Highly resistant to most chemicals including strong and weak acids and alkalines, organic chemicals, and salt solutions.
- Widely recommended by environmental professionals.
- Unequaled durability when compared to non-woven fabric.
- Allows high rate of water or chemical flow while filtering out fine particles.
- Extremely cost effective.
- Easy to install.
- Patented technology – field tested since 1985.

Sold in 100 ft. Rolls Only

Each roll covers approximately 7', 8', or 10' well screens. Do NOT pre-cut filter sock to length prior to installation.
