

Typical Eductor Installation Schematics

What advantages does it offer?

- Works for total fluids recovery and soil vapor extraction
- Costs less to install, operate, and maintain
- Is easily designed, constructed, and operated with a single pump drive to multiple extraction wells
- Has no moving parts (stationary eductors at wellhead or inside the wells)
- Performs well in both low and high yield aquifers
- Simple and reliable
- Self-priming
- Corrosion and erosion resistant
- Non-electrical
- Effective for shallow or deep water levels
